Re: Daily COVID Update -

Yesterday, we had a staff member test positive who worked on the west side. Under the new IDPH guidance, a positive test among a staff member or a resident requires suspension of all group activities, communal dining and beauty/barber for all residents on all units. While the Terrace and West were already on quarantine, the new positive required East to quarantine as well.

Under the new guidance, as soon as a round of testing of all residents and all staff can be done with no new positives, then the quarantine can be lifted for the unit that did not have a positive.

We are testing all residents and staff today and tomorrow. If there are no new positives, East side will come off of quarantine Friday. If there are no new positives going forward, Terrace will come off of quarantine on 4/16 and West on 4/21.
